

FACULTY OF ENGINEERING TECHNOLOGY

Subject: Comm.& Data Transmission

Quiz 2(2)

Name: *ليث قاسم محمد عوي*

Duration: 5 minutes

Question	1	2	3	4	5
Answer	<i>A</i>	<i>A</i>	<i>A</i>	<i>A</i>	<i>A</i>

1. In FSK technique, the process of modulation produces:

- a. A nonperiodic analog composite signal
- b. A periodic analog composite signal
- c. A nonperiodic digital composite signal
- d. A periodic digital composite signal

2. In Amplitude Shift Keying, the result of this process is:

- a. modulated signal with varying amplitude
- b. modulating signal with varying frequency
- c. carrier signal with varying frequency
- d. message signal with varying frequency

3. The bandwidth is greater in the following technique:

- a. FSK
- b. ASK
- c. PSK
- d. QAM

4. Quantization levels are more in:

- a. video signal
- b. audio signal
- c. speech signal
- d. music signal

5. If the bandwidth of speech signal is 5 KHz, then number of samples is needed equal to:

- a. 10000
- b. 5000
- c. 2
- d. 4
