

Final Exam

Course Title**

PLC HARDWARE AND PROGRAMMING

Course Code

ELE2483

Student Name

Student ID No.

Section 1

Q1 (15Marks)

Select the best correct answer, and write it in the table below.

1. PLC Ladder logic diagram is similar to:

- a- Flowchart b- Block diagram. c- Circuit board d- Electrical relay diagram

2. PLC scan cycle starts with:

- a- Input scan b- Program execution c- Memory reset d- Output scan

3. Which of the following is NOT a PLC component?

- a- Input module b- Monitor. c- Power supply. d- CPU

4. Which timer type starts timing after input turns ON?

- a-OFF-delay timer b- Pulse timer c- All timers d- ON-delay timer

5. What does retentive timer do?

- a- Resets automatically b- Works only once c- Restart the PLC d- Retains value after power loss

6. What is the function of latch instruction?

- a- Delay ON b- Permanent ON until reset c- Pulse output d- Temporary ON

7. Which of the following instruction transfers data in PLC?

- a- ADD b- SUB c- CMP d- MOVE

8. What does PID control regulate?.

- a- Continuous processes b- ON/OFF control c- Digital signals d- Only programmed

9. Allen-Bradley retentive timer instruction is:

- a- TON b- TMR c- RTO d- TP

10. Siemens PLC scan cycle order is:

- a-Output → Input → Program b- Input → Program → Output c- Program → Input → Output d- Random

11. Siemens PLC instruction to move data is:

- a- MOVE b- TRANSFER c- MOV d- LOAD

12. Siemens retentive timer instruction is:

- a-TON b- TP c- RTO d- TMR

13. Siemens counter instruction for down counting is:

- a- CTUD b- CTD c-CUD d- CDT

14. What resets a Siemens counter?

- a- CU input b- PV input c- R input d- Q output

15. What resets a Siemens timer?

- a- Input FALSE b- Power OFF c- Output Q d- Reset input (R)
